Macquarie Graduate School of Management (MGSM) has an international reputation for excellence in management education.

One of the first business schools established in Australia, MGSM has been providing the highest-quality management education since 1969.

MGSM is ranked the number one business school in Australia by the Financial Times and in the top 50 in the world by The Economist.

MGSM is also part of an elite group of institutions that have achieved accreditation from AACSB International. Only five per cent of business schools worldwide have earned this distinguished hallmark of excellence, a testament to MGSM's high-quality teaching and research environment.

Research excellence through corporate engagement

Australian business relies on world-leading, practical, collaborative and interdisciplinary innovation, and MGSM’s approach to research ensures that theoretical advancements inform and relate to practical knowledge and techniques. For this reason, MGSM’s research has an immediate and useful impact in developing tools, skills and knowledge for its research partners.

MGSM undertakes research projects with a network of partners that include some of the world's most influential businesses. Corporate relationships are a cornerstone of MGSM, and our partners include leading global businesses such as Australian Securities Exchange, Pfizer, Siemens Healthcare, Datacom, CoreLogic, Australian Lions Childhood Cancer Research Foundation, Johnson & Johnson, Chris O’Brien Lifehouse, Australian Business Foundation, Be Learning, and NSW Trade and Investment.

MGSM also enjoys research linkages with other leading global academic institutions including University of Edinburgh (UK), Tsinghua University’s School of Finance (China), ESSEC Business School (France), EBS University of Business and Law (Germany), Copenhagen Business School (Denmark), and University of Reading’s Henley Business School (UK).

As a higher degree research candidate at MGSM, you will have the opportunity to be involved in forward-thinking research with a high impact on industry best practice alongside scholars who are leading business professionals both nationally and internationally. You will join a global cohort of candidates, many of who are drawing on significant corporate experience to inform their research.
Highlights

• Our researchers play a significant role in the Australian Government’s $100 million Capital Markets CRC, which brings together the best in innovative research and technology with the objective of making a profound difference to the health insurance and capital market domains.

• In collaboration with our corporate partners, we provide scholarships for higher degree research candidates valued at up to $50,000 per annum. Eligible applicants will have the opportunity to engage with corporate partners to address specific industry challenges and needs. Working within a collaborative research environment, you will work under the guidance of faculty members and with internal industry experts. This collaborative model has produced outstanding results for candidates and industry partners alike.

• As an MGSM higher degree research candidate, you will benefit from the expertise of prominent Macquarie alumni and distinguished executives from leading multinationals such as Citibank, Australasia Consulting Group, Centric Management and Governance Solutions, Cochlear Ltd, EmpowerIS, Farrington American Express Travel Services, IBM Global Financing, Influence Consulting, Patersons Securities, PepsiCo, Talent2, The Six Hats and The Trust Company, which sit on our Alumni Advisory Council.

• Our world-class research-active faculty members have been awarded grants from CRC and ARC to fund further research, and have published their research in renowned journals including Nature, Journal of Finance, Journal of Financial Economics, Organisational Studies, Journal of Business Ethics and Harvard Business Review.

“We are committed to leading-edge, hands-on collaborative research that meets real business needs”

Professor Alex Frino, Dean, MGSM

SUPPORT

You will be provided with individualised support, as well as a range of opportunities, at all stages of your research degree, including:

• financial support for eligible candidates for a range of research-related activities including conference travel, computing hardware and software, and research training

• access to industry through our established links and collaborations with some of the world’s most influential businesses across many sectors

• learning and development opportunities including seminars and workshops designed to enhance your research skills and knowledge

• dedicated librarian to support your research and administrative staff to guide and assist you during your candidature

• access to a global community of research scholars, with the opportunity to attend and network at local and international academic conferences and events.
